## MEMORANDUM

Date: April 30, 2025  
Project: East Side Park Remodel, MES No. 2023-66  
Engineer: M.E. Sack Engineering  
Hinesville, Georgia

The purpose of this memo is to provide clarification on the question listed below.

1. *According to RCP Shelters, factory-stained tongue and groove wood decking and pressure treated glulam beams will be included in their material kit. Will there need to be an additional finish to the glulam beams & tongue and groove wood decking?*
  - The RCP Shelters drawings were included as a basis of design. The Contractor can either use the provided RCP Shelters design, in which case no further finishes would be necessary, or they can provide like components. If like components are provided, the finishes for these materials, similar to all amphitheater exterior finishes, would need to be submitted to the Engineer for architectural review and approval.
